

Anti-Ram fencing

Anti-Ram fencing

Elegant and solid security

This fencing system is especially designed to secure your land from unauthorised vehicle access or exit and at the same time keep it accessible for pedestrians. No more fear of unofficial driving around onto or from your premises, land or risk of being ram-raided. The entrance remains stylish because of the beautiful design regardless of the fact you are securing a garage forecourt, vehicle/caravan storage area, a shop, parkland, industrial site, wherever or whatever type of space.

Anti-Ram Security

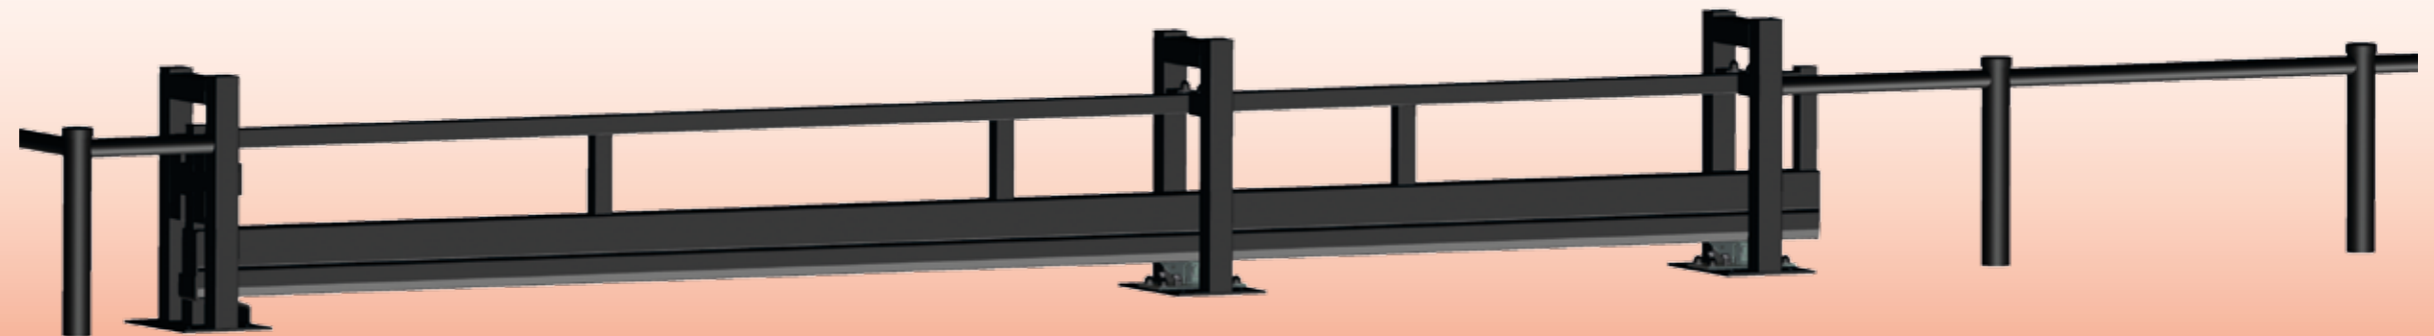

The Hop Fencing Systems Anti-Ram fence (HFS DB) is suitable for both internal and external use. The standard construction is supplied using heavy tubular section posts and tubular rail. The posts are designed to be set deep into the ground using concrete foundations and spaced at 1.50 meters centre to centre. Too deep to be easily pulled out or pushed over, moreover too narrow for vehicles to drive between. An extremely robust but elegant structure. The fencing system is also available with a coated finish and plastic caps.

Sliding Gate

You can secure your entrance with our tough but smart sliding gate. The construction of this gate is to match the design of our DB system, everything looks compact and as one. Both the DB and sliding gate are galvanised according to the requirements of NEN-EN-ISO 1461 and can be additionally provided with a polyester coating (NEN-5254) in almost any colour wished.

Alternative Secured Entrances

Of course you can secure your entrance in different ways. Hop Fencing Systems provides a wide assortment of functional heavy or standard systems, including gates, arm barriers, bollards and rising kerbs. Do not hesitate to ask about the possibilities.
